To celebrate automotive excellence, **we're offering our powerful 1,250 HP Reaper engine INSTALLED in your Hellcat Charger or Challenger, TRX, Hellcat Durango or Trackhawk for \$25,000 at our Houston, TX facility or our new speed shop on Long Island in New York!** This includes everything you need: the engine, in-house DYNO-tuning, support and installation. Plus, we'll even crate up your old motor so you can turn around and sell it for profit. (Good Hellcat motors are going for about \$10K right now. Just sayin'!)

The Reaper engine is meticulously crafted for maximum power and reliability, tested on the track and street. It's hassle-free, works flawlessly with your stock PCM system and can be easily tuned for any application. From a peppy daily commuter to all-out performance on the dragstrip, this engine allows you to do it all with ease and without headache.

* Ethanol recommend for maximum output.
